

HOW DO I GET CERTIFIED?

1 Take Classes

Learn the basics of Mastercam through one or more of these resources:

- Reseller Class
- Mastercam University
- 3rd Party Training
- Professional Experience
- Educational Institution

2 Take Associate Certification Exam

3 Practice

- Take Additional Courses
- Shop Time/Practice
- Other Forms of Learning

4 Pretest

- Review Practice Parts Guide

5 Take Professional Certification Exam

1

Reseller Class – Take a Mastercam class from a local Reseller that will cover all material needed to pass the Associate Exam. These classes are done in a classroom setting with personal instruction available.

Mastercam University – Take an online course developed by CNC Software, Inc. These are self-paced classes that can be viewed on any device that has an internet connection.

3rd Party Training – Review content from other sources of online or publication providers.

Professional Experience – More than 5 years of CAM programming experience and familiarity with the current version of Mastercam indicates proficiency.

Educational Institution – Take a class from one of the following: secondary, postsecondary, or trade school.

2

Associate Certification Exam – A collection of knowledge-based multiple choice tests. Once each section has been passed with a score of 80% or better, you achieve Mastercam Associate Certification, and the certificate is automatically attached to your profile.

3

Take Additional Courses – Enroll in additional Mastercam University courses that will help prepare you for the Professional Exam.

Shop Time/Practice – Invest time in programming parts in the current version of Mastercam.

Other Forms of Additional Learning – Supplemental reading or coursework online or in person.

4

Review Practice Parts Guide – Review practice parts that will help determine if you are ready to take the Professional Exam.

5

Professional Certification Exam – Skills-based test that will require you to demonstrate specific skills in the current version of Mastercam.
