Press Release

Mastercam Expands CAM Ecosystem with Strategic Acquisitions in the Southeast

Strategic move advances smart manufacturing solutions with new partners and CIMCO probing technology and post processor business integration

Tolland, CT, March 3, 2025

Tolland CT - Sandvik announces the acquisition of Barefoot CNC, CAD/CAM Solutions, and CamTech Engineering Services, marking significant milestones in Mastercam's mission to shape the future of manufacturing. Additionally, Sandvik has acquired CIMCO probing technology and post processor business, a software add-on for CAD/CAM programs that enables CNC touch probes to measure and locate workpieces before machining, improving part quality and reducing set up time.

Barefoot CNC has served North Carolina and South Carolina for over 30 years, CAD/CAM Solutions has been a trusted partner in Alabama, Georgia, and Tennessee, and CamTech Engineering Services has delivered best-in-class solutions in Florida. Integrating these partners strengthens Mastercam's regional support and enhances our commitment to providing exceptional CAD/CAM solutions.

"Welcoming the resources of Barefoot CNC, CAD/CAM Solutions, and CamTech Engineering Services into the Mastercam team strengthens our commitment to supporting manufacturers across the Southeastern United States with exceptional support and industry-leading CAD/CAM solutions," said Russ Bukowski, Interim President, Mastercam. "These acquisitions allow us to build even stronger relationships with our customers in this region, ensuring their success in a dynamic manufacturing landscape."

Mastercam's growth strategy combines organic advancements with targeted acquisitions to expand capabilities and provide industry-leading solutions. As part of the Sandvik portfolio, Mastercam continues to empower manufacturers globally with advanced solutions, connected processes, and unparalleled support.

Sandvik's additional acquisition of CIMCO's probing technology and post processor business, will enhance Mastercam's suite of manufacturing tools, offering a seamless and integrated experience for customers. The tool that has already been used by machinists as a software add-on with Mastercam programs, will immediately be rebranded as Mastercam Probing. "Integrating the CIMCO probing technology and post processor business into our offerings and rebranding it as Mastercam Probing enhances the seamless experience we provide our customers," said Bukowski. "This evolution ensures manufacturers have access to the most advanced, fully integrated solutions, empowering them to maintain a competitive edge."

About Mastercam

Shaping the Future of Manufacturing®, Mastercam is the world's leading provider of CAD/CAM solutions. As part of Sandvik, we empower manufacturers to enhance productivity, streamline processes, and drive innovation. With a global network of Channel Partners and an extensive developer community, Mastercam continues to set industry standards by delivering comprehensive, connected solutions across the manufacturing enterprise. We lead the way with cutting-edge technology and unparalleled expertise. Discover more at www.mastercam.com, follow us on [LinkedIn](#), and join the conversation with #mastercam.

Sandvik Group

Sandvik is a global, high-tech engineering group providing solutions that enhance productivity, profitability and sustainability for the manufacturing, mining and infrastructure industries. We are at the forefront of digitalization and focus on optimizing our customers' processes. Our world-leading offerings include equipment, tools, services and digital solutions for machining, mining, rock excavation and rock processing. In 2024 the Group had approximately 41,000 employees and revenues of about SEK 123 billion in about 150 countries within continuing operations.
